Document type:	Product statement
Status:	Supporting document for intellectual-property registration preparation in Malabo.

Purpose

This document summarizes the product as an integrated technology work, its public-service purpose, and responsible control of its design.

Product description

- The National Digital Addressing System is a digital platform for capturing, reviewing, administering, publishing, and verifying official addresses and territorial evidence.
- The product integrates public workflows, field operations, institutional review, official registry, controlled publication, reporting, audit, and technical support.

Responsible person

- Benjamin Bob Bechiro, founder of BeCorps, assumes responsibility for design, implementation, architecture, functional evolution, and documentation coordination.

Public value

- Improves location of people, properties, services, institutions, and economic activity.
- Supports territorial administration, public services, logistics, emergency response, planning, registry work, and operational transparency.
