Document Control

Title:	Cybersecurity Manual
Product:	National Digital Addressing System
Responsible founder:	Benjamin Bob Bechiro
Company:	BeCorps
Document type:	Security manual
Status:	Supporting document for intellectual-property registration preparation in Malabo.

Purpose

This manual summarizes minimum security controls for protecting users, sessions, location data, evidence, and official publication.

Access controls

- Mandatory authentication for internal areas.
- Separate roles for administration, editing, viewing, and review.
- Session revocation when users are disabled or passwords rotated.
- Critical actions locked when institutional approval is missing.

Data protection

- Minimization of citizen data and identity documents.
- Separation between public data and protected operator data.
- Masking sensitive identifiers in reports and exports.
- Audit of relevant actions.

Secure operation

- Do not store secrets in source code or public documents.
- Controlled backups and tested restoration.
- Incident, correction, and follow-up records.
- Dependency updates and review of critical changes.
