National Digital Addressing System Specification

Documentation prepared for intellectual-property registration in Malabo.

Responsible founder: Benjamin Bob Bechiro. Company: BeCorps.

Document Control

Title:	National Digital Addressing System Specification
Product:	National Digital Addressing System
Responsible founder:	Benjamin Bob Bechiro
Company:	BeCorps
Document type:	Specification
Status:	Supporting document for intellectual-property registration preparation in Malabo.

Purpose

This specification summarizes functional requirements, data rules, interoperability, and expansion of the system.

Objective

- Create a national layer of verifiable digital addresses.
- Enable controlled public capture, technical and institutional review, official publication, and citizen verification.
- Support future integration with institutions, public services, logistics, and territorial planning.

Functional requirements

- Location registration and request tracking.
- Field-evidence review.
- Management of roads, buildings, territories, and administrative units.
- Address-code generation and validation.
- Controlled publication, public proof, certificates, and signage.
- Reports, audit, export, and user administration.

Interoperability and expansion

- Versioned API for future integrations.
- Extensible administrative hierarchy.
- GIS model compatible with standard coordinates.
- Privacy and publication controls before exposing information.
